EDUCATION

2022 - 2025

- Graduated from RUPP in IT department
- Started backend development with Django in 2024

2021 - 2022

- I have successfully learned about basic front-end web development

SKILLS

- Python
- Django, DRF and FastAPI
- HTML, CSS and JavaScript
- Vue.js, Next.js and Tailwind-css
- Linux Server, Docker
- Git, Github and CI/CD
- PostgreSQL, SQLAlchemy, SQLAlchemy
- RAG Architecture & Agentic AI

LANGUAGES

- Khmer (Mother Tongue)
- English (Very Good)

Fresh graduate in Information Technology from RUPP with a strong interest in full-stack development, backend engineering, and AI-powered applications. Skilled in Python, Django, DRF, FastAPI, PostgreSQL, Next.js, Vue.js, JavaScript, and Retrieval-Augmented Generation (RAG) architectures. Experienced in developing responsive full-stack web applications, RESTful APIs, database-driven systems, integrating Large Language Models (LLMs) with vector databases for intelligent knowledge retrieval, and deploying applications on Linux servers using Docker and Nginx. Proficient in building modern frontend interfaces with Next.js and Vue.js while designing scalable backend services and APIs. Fast learner, dependable team player, and eager to contribute to full-stack, backend, and AI engineering projects while continuously expanding expertise in scalable system design, cloud technologies, and modern software architecture.

WORK EXPERIENCE

Freelancer

2025 - PRESENT

Full-Stack Developer

Project: Chatbot with RAG (ChatEaver)

- Architected and developed ChatEaver, a production-grade multi-tenant AI customer support SaaS platform using FastAPI, and Next.js.
- Engineered an advanced hierarchical RAG pipeline using LlamaIndex and pgvector for accurate, context-aware retrieval.
- Built a multi-LLM architecture with a 3-layer agentic orchestrator for flexible and reliable AI workflows
- Developed real-time messaging using WebSocket for low-latency, bidirectional communication.
- Developed an embeddable real-time chat widget and JavaScript SDK
- Designed workflows for human handoff, quote requests, and appointment/booking automation.
- Built secure Server-to-Server (S2S) APIs for reliable data exchange
- Integrated Lemon Squeezy subscription billing
- Deployed the platform using Docker Compose, Caddy/Nginx, and Linux servers

Project: Calinvite

- Built Calinvite, a platform for selling wedding invitation templates
- Developed custom web applications for clients
- Built full-stack solutions with Django, DRF, FastAPI, and Vue.js
- Designed and maintained PostgreSQL databases

EZZE Technology

2024 - 2025

Backend Developer

- Worked as a Backend Developer using DRF and FastAPI
- Developed Telegram bots with Django and FastAPI
- Integrated local payment bank for QR transactions
- Created RESTful APIs with DRF and FastAPI
- Deployed high-performance backends using FastAPI
- Configured Apache, Unicorn, and SSL on Linux servers
- Used Git and GitHub for version control and teamwork
- Designed and managed MySQL and PostgreSQL databases
- Built and documented APIs with secure authentication

POSFlow Solutions

2023 - 2024

Customer Support

- Provided technical support for POS (Point of Sale) systems
- Configured and maintained thermal printers and POS peripherals
- Installed and troubleshooted routers, LAN, and WAN networks
