- Started backend development with Django in 2024

2021 - 2022

- I have successfully learned about basic front-end web development

SKILLS

- Python
- Django, DRF and FastAPI
- HTML, CSS and JavaScript
- Vue.js, Next.js and Tailwind-css
- Linux Server, Docker
- Git, Github and CI/CD
- PostgreSQL, SQLAlchemy
- RAG Architecture & Agentic AI

LANGUAGES

- Khmer (Native Language)
- English (Very Good)

WORK EXPERIENCE

Freelancer

2025 - PRESENT

Full-Stack Developer

Project: ChatEaver(Chatbot with RAG)

- Architected and developed ChatEaver, a production-grade multi-tenant AI customer support SaaS platform using FastAPI, and Next.js.
- Engineered an advanced hierarchical RAG pipeline using LlamaIndex and pgvector for accurate, context-aware retrieval.
- Built a multi-LLM architecture with a 3-layer agentic orchestrator for flexible and reliable AI workflows
- Developed real-time messaging using WebSocket for low-latency, bidirectional communication.
- Developed an embeddable real-time chat widget and JavaScript SDK
- Designed workflows for human handoff, quote requests, and appointment/booking automation.
- Built secure Server-to-Server (S2S) APIs for reliable data exchange
- Integrated Lemon Squeezy subscription billing
- Deployed the platform using Docker Compose, Caddy/Nginx, and Linux servers

Project: Runbodia (Marathon Events Platform)

- Architected a full-stack running events and marathon ticketing platform using Django REST Framework, PostgreSQL, and Vue.js.
- Integrated ACLEDA Bank KHQR payment gateway with idempotency tokens, secure redirections, and automated verification.
- Engineered automated 30-minute bib number lock reservations and multi-tiered pricing (Early Bird, Regular, Late).
- Implemented digital ticket generation with signed QR codes for race-day check-in and automated email invoice confirmations.
- Built dynamic category and race kit package management
- Developed post-event features including participant ranking leaderboards and high-resolution photo gallery uploads.
- Customized an admin dashboard with Django Unfold

Project: CalInvite (Wedding Invitation Platform)

- Built Calinvite, a platform for selling wedding invitation templates
- Developed custom web applications for clients
- Built full-stack solutions with Django, DRF, and Vue.js
- Designed and maintained PostgreSQL databases

EZZE Technology

Backend Developer

2024 - 2025

- Developed Telegram bots with Django and FastAPI
- Integrated local payment bank for QR transactions
- Built REST APIs and backend services with DRF and FastAPI.
- Deployed backends using Apache, Unicorn on Ubuntu server.
- Managed PostgreSQL databases and Git/GitHub workflows.

POSFlow Solutions

Customer Support

2023 - 2024

- Provided technical support for POS (Point of Sale) systems
- Configured and maintained thermal printers and POS peripherals
- Installed and troubleshooted routers, LAN, and WAN networks
- Delivered customer support and resolved technical issues
- Performed system testing, troubleshooting, and quality assurance
- Troubleshooted desktop computers, OS, hardware, and software
